

Radiology Department

Mountrail County Medical Center's Radiology Department offers advanced, up-to-date equipment thanks to grants, private donations, and the Reiarson Trust. MRIs, CTs, mammograms, ultrasounds, echoes, and X-Rays are available right here in Stanley, even if your provider is from out of town.

Hours: Mon–Fri, 8:00 AM–4:30 PM
Walk-ins welcome for X-Rays. Bring your doctor's order or have it faxed to:

- **Radiology Fax:** 701-628-3074

MRIs, Ultrasounds, Echoes, Mammograms and non-emergent CTs will need to be scheduled ahead of time.

RADIOLOGY DEPARTMENT

 Mountrail County Health Center

2-D and 3-D Mammography:

By appointment only, call (701) 628-8629 to schedule.

The Mountrail County Medical Center installed an in-house high definition Mammogram unit in 2018. The Mammomat Revelation has a 50 degree wide angle and provides a high quality 3D mammogram. With it's personalized flexible compression paddles, we can make the experience of a mammogram a positive one.

- Annual screenings, diagnostic exams
- Outpatient

NEW GE Signa Voyager MRI

Mountrail County Health Center has partnered with Shared Medical Services as the new mobile MRI service provider to add the SIGNA Voyager to our imaging services. This advanced system is designed to maximize patient comfort while delivering uncompromised image quality.

MRI Services:

We offer full-body outpatient MRI scans, excluding the prostate, rectum, female pelvis, and breast.

- Outpatient

Ultrasound Services:

We're proud to offer advanced imaging with our brand-new ultrasound equipment, including the Mindray TEX system for the ER and the GE Logiq E10s for outpatient care.

Available Ultrasound Exams:

- AAA Screenings
- Echocardiograms (adult only)
- Prenatal
- Breast
- Abdomen
- Pelvis
- Scrotum
- Venous Duplex
- Carotid
- Thyroid
- Pediatric (excluding echocardiograms)

Radiology:

Our machines provide high-quality images with minimal radiation exposure.

- Inpatient, Outpatient and ER

CT Scanner:

Our 80-slice CT scanner delivers faster, more detailed scans for accurate results. We offer full-body CT imaging, including Low Dose Lung Screenings and Cardiac Calcium Scores.

► **Cardiac Calcium Scores** are \$75 tests that look for plaque and calcium buildup in the heart (possible precursors for heart attack). A risk assessment form needs to be filled out with the patient with their Provider signing off on it. They are all self-referral and paid for in cash or check when the patient arrives.

- Inpatient, Outpatient and ER
